

KUJENGA MAISHA EAST AFRICA (KUMEA) - UGANDA

Project Completion Report

Dated: 18th October, 2018

AWEIYEC – SHALLOW WELL PROJECT

Project Location:

- Board from Kampala to Lira,
- From Lira you take Soroti road 19 km and branch off from Awoiodyek center,
- From Awoiodyek you turn on your right and go for about 3km to Amokoge 'A' village.

1.0 PROJECT OVERVIEW

1.1 Project Area Description

There was an uprising in this region for over 20 years under the Lord's Resistance Army led by Kony. This disorganized and affected a lot of people in the region. Many people ended up leaving their homes and sought refuge in the Internally Displaced People's (IDPs) camps that had been put aside by the government arrangements.

When peace was restored in this region, people had to come back to their land and continued with life. As of today most areas are just being rehabilitated.

During my discussion with the area Local Council 1 chairman Mr. Geoffrey Otuk (+256 770555284) he showed concern of clean water in his village as the dwellers have been suffering to find water.

The village of Amokoge 'A' where the shallow well has been dug is located as follows;

Village – Amokoge 'A'
Parish – Amokoge
Sub County – Amach
County – Erute South in
District – Lira

The village of Amokoge 'A' has about 370 houses and about a population of 2000 people. About 500 people will benefit with the newly dug well.

1.2 Challenges faced

- The people has been getting water from Burkwoyo well which was some distance away.
- The only well was even shared with animals as it was the only water source in the area.
- Sometime the water could change color hence causing diseases

Below are some pictures to speak volume.
